Forecast for Wednesday 04 Oct 2023

Weather: A bright day across the east with some sunny spells, but western hills look cloudier with a little rain or drizzle at times. Cloud increases from the north from mid-afternoon with outbreaks of mainly light rain, becoming more extensive through the evening.

Chance of cloud-free hill tops above 600m: Little chance at first but soon becoming 25% in west and nearer 90% in east. Chances decrease to near zero in west in the late afternoon and evening and near 25% in the east.

Low Cloud and visibility: Periods or persistent cloud above about 600m in west but cloud becoming more occasional above 750m in the east until late afternoon, with patches developing above 450m in the west during the evening and becoming periods above 600m in the east. Otherwise visibility good or very good falling to several kilometres at times in rain and drizzle.
